

CONTINUOUS EXTRUSION SHUTTLE BLOW MOLDING

IN-LINE AUTOMATED TESTING

IN-LINE AUTOMATED CNC FINISHING

CLOSURE TOOLING AND MOLDING

MGS is uniquely positioned with in-house resources to provide Time-to-Market performance solutions.

The MGS Mfg. Group offers fully automated, continuous extrusion shuttle blow molding services. This continuous process increases output, provides consistent quality, and proves to be a long term cost-effective solution.

We have the technology, flexibility, and capacity to produce a variety of custom containers, from small sizes with high cavitations through large, two-gallon units. In recognition of our innovative manufacturing capabilities, MGS has received one WorldStar and three AmeriStar awards from the Institute of Packaging Professionals.

- ISO/TS16949:2002 and ISO 9001:2000 Certified
- NSF (National Sanitation Foundation) Approved
- FDA (Food and Drug Administration) Registered
- CSA (Canadian Standards Association) Certified
- Manufacturing systems compliant with GMP (Good Manufacturing Practices)

Blow molding is integrated with extensive injection molding resources (over 130 injection molding machines, from 28T – 880T) – establishing the MGS Mfg. Group as *the single source* supplier for containers AND closures.

"The relationship that has developed between MGS and Bekum has resulted in some very unique and exciting blow molding developments. With their advanced tooling expertise and progressive manufacturing capabilities, we look for the MGS Mfg. Group to make significant inroads in extrusion blow molding."

Martin Stark, President (Retired)
Bekum America Corporation
