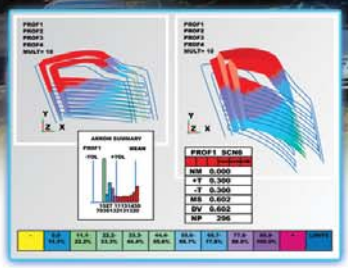
ENGINEERING/DESIGN & MOLDMAKING



DEVELOPMENT/ QUALIFICATION

INJECTION MOLDING/ BLOW MOLDING

EQUIPMENT

The MGS Mfg. Group is committed to advanced engineering solutions, providing customers with quality driven products and services for over 25 years.

With a tradition of exceeding our customer's expectations, the MGS team excels in engineering & design, moldmaking, development & qualification, injection molding, multishot technologies, continuous extrusion blow molding, scalable automation, assemblies, and complete turnkey manufacturing systems.

Our personnel, facilities, technologies, and expertise combine for seamless integration to ensure your program's success.

With experience and a dedication to progress, the MGS Mfg. Group delivers results to our customers while developing leading-edge innovations within the plastic industry.

Moldmaking

Engineering & Design

High Speed / High Precision Machining

Automated Mold Building Cells

Development/Qualification

Diverse Metrology Capabilities

Mold Testing & Process Development

Mold Optimization

Manufacturing

ISO Class 8 Clean Room Molding & Assembly

Continuous Extrusion Shuttle Blow Molding

Value Added Secondary Operations & Flexible Assembly Automation

Equipment

Universal Multishot Systems

- Portable Injection Units
- Rotary Platens
- Vacuum Units
- Hot Runner Controllers

We are an engineering company delivering performance solutions for moldmaking, development/qualification, manufacturing, and equipment for the plastics industry.
